Subject: Microsoft Settlement

Dear Madam or Sirs:

I have been very interested and am very pleased with the Federal Government's Decision to an agreement and settlement with Microsoft Corporation. The interest of our country and our economy are best served by this settlement, and affording both parties to move forward without additional legal hassels.

The importance of integrated software and the attractiveness of packaging this into products that enhance the user's familiarity and productivity is most important. I think these aims are well served by the settlement, also.
